What is Phishing?

- * **Phishing** is a form of fraud in which an attacker masquerades as a reputable entity or person in email or other communication channels. The attacker uses phishing emails to distribute malicious links or attachments that can perform a variety of functions, including the extraction of login credentials or account information from victims.

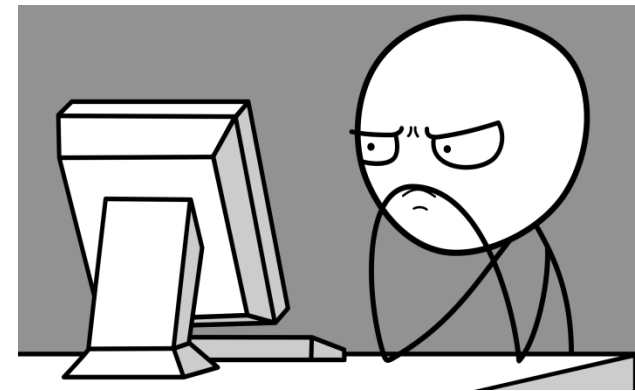

Phishing cont.

- * Typically they are looking for:
 - * Usernames
 - * Bank information
 - * SS #
 - * Physical location/telephone number
 - * Other people you are connected to
 - * Work information

How Do They Do IT?

- * Phishing attacks typically rely on social networking techniques applied to email or other electronic communication methods, including direct messages sent over social networks, SMS text messages and other instant messaging modes.

Ban them from using the computer???

How do we help our youth?

Good luck with that! 😊

Tips

- * Introduce youth to the internet on a supervised basis and start young.
- * Utilize social media websites like Special Friends which is continuously monitor activity on website. AND its by real people.
- * Know when your youth is online-but still give them some time to be online by themselves

Tip cont

- * Create a Do's and Don't List and place next to computer so it is seen all of the time.
- * Talk about appropriate ways or times to disclose about a disability to online community members
- * Creative games to teach youth about online safety.
